SADEEM MOHAMMED ALJUFRAN

AI Engineer

Riyadh, Saudi Arabia | +966 50 928 7939 | sadeemjuf@gmail.com | linkedin.com/in/sadeem-aljufran | Portfolio: sadeemai.github.io

CAREER OBJECTIVE

AI graduate from University of Bisha (GPA 4.56/5) and graduate of the SDA Agentic AI Bootcamp, with hands-on experience building computer vision and multi-agent AI systems and applied exposure to AI governance through a national-level internship. Seeking an entry-level AI Engineer role to apply machine learning, computer vision, agentic AI and responsible AI practices to real-world systems.

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, R
AI & Machine Learning: TensorFlow / Keras, PyTorch, Scikit-learn, Matplotlib, Seaborn, Azure AI Fundamentals
Agentic AI & LLMs: LangGraph, LangChain, OpenAI API, RAG with FAISS, tool calling, multi-agent pipelines
Computer Vision: MediaPipe Pose, OpenCV, LSTM sequence models
Data & Databases: SQL, Data Preprocessing, Data Visualization, Pattern Recognition
Web & APIs: FastAPI, React, Streamlit, SQLite, pytest
Tools: Git & GitHub, Microsoft Azure, Google Colab, MATLAB, Power BI
Specialization: Computer Vision, Natural Language Processing (NLP), Deep Learning, AI Governance & Responsible AI

EXPERIENCE

Agentic AI Bootcamp | *Saudi Digital Academy (SDA) with WeCloudData — Aug 2026 – Oct 2026, 7 weeks*

- Intensive program on building LLM agents: RAG, tool calling, multi-agent workflows, guardrails and agent evaluation
- Capstone: Hakaya, an AI movement storytelling game for children, built in a team of four (see Projects)

AI Intern, Cooperative Training Program | *Ministry of Human Resources and Social Development, Saudi Arabia — 6 months*

- Supported AI governance initiatives, reviewing AI use cases against internal policy and responsible-AI principles
- Documented AI governance guidelines and best practices to support compliant, ethical AI deployment
- Collaborated with cross-functional stakeholders to align AI projects with data protection and governance requirements

PROJECTS

Hakaya — AI Movement Storytelling Game for Children | *SDA Bootcamp Capstone, 2026 | Python, TensorFlow, MediaPipe, LangGraph, FastAPI, React*

- Designed and trained the movement-verification model: MediaPipe Pose landmarks fed to an LSTM with five independent yes/no outputs (jump, march, run, squat, swim), validated with a source-level split to prevent data leakage
- Built the Movement Analysis Agent that connects the webcam to the game, with a motion-based rep counter validated on 55 real video clips
- Integrated the React web app with the FastAPI back ends: saved sessions, a parent dashboard and live difficulty adaptation, covered by a pytest suite

DermaScan — AI-Based Skin Lesion Classification Platform | *Graduation Project, Dec 2025 | Python, TensorFlow, PHP, MySQL, Bootstrap*

- Trained an EfficientNetB0 deep learning model on the HAM10000 dataset to classify 7 categories of skin lesions
- Designed a multi-role web interface (patient, doctor, admin) integrating the ML model with a PHP/MySQL back end
- Conducted a 326-participant survey on public awareness and attitudes toward AI in healthcare to guide UX design

CERTIFICATIONS

- Agentic AI Bootcamp — Saudi Digital Academy & WeCloudData, 2026
- Neural Networks and Deep Learning — DeepLearning.AI, 2025
- Introducing Generative AI with AWS — Udacity, 2025
- GitHub & Git — Coursera Project Network, 2025
- Python Functions, Files, and Dictionaries — University of Michigan, 2024
- Python Basics — University of Michigan, 2024

EDUCATION

Bachelor of Artificial Intelligence — University of Bisha, Bisha, Saudi Arabia | GPA: 4.56/5.00

LANGUAGES

Arabic (Native) | English (Fluent)
